Barts and The London NHS Trust Individual Placement Description

Placement	F2 Cardiology
The department	<p>The Cardiology Department of Barts and the London NHS Trust (BLT) provides tertiary level care for a population of 1.8 million people in the North East London sector plus secondary level cardiac care to the local population.</p> <p>The Trust Cardiology services are provided mainly at The London Chest Hospital (where this post is based) and at St. Bartholomew's Hospital, with three cardiac catheter laboratories on each site.</p> <p>The London Chest Hospital provides the regional Heart Attack Centre, interventional cardiology including PCI and TAVI, & non-invasive imaging including MRI and CT.</p> <p>St. Bartholomew's Hospital provides the electrophysiology services for the region including radiofrequency ablation of arrhythmia, and implantation of pacemakers, ICDs and CRT.</p>
The type of work to expect and learning opportunities	<p>The F2 doctor will be based on the wards at The London Chest Hospital. He or she will be responsible for the delivery of the day-to-day care of cardiology inpatients.</p> <p>There is a high turn over of patients with a range of acute and chronic cardiac conditions including acute coronary syndromes, heart failure, valve disease, and arrhythmia. Some patients are acutely unwell and require cardiorespiratory support, for example, with CPAP and/or an intra-aortic balloon pump.</p> <p>Many cardiac patients either have pre-existing medical conditions or develop acute medical conditions such as gastrointestinal haemorrhage, pneumonia, renal failure, or stroke. This post therefore provides many learning opportunities.</p> <p>The overall educational objectives of this post include many of the generic competencies in the Foundation curriculum plus the development of competency in many of the symptom and disease-specific competencies:</p> <ul style="list-style-type: none"> • Keep an accurate and relevant medical record • Manage time and clinical priorities effectively • Communicate effectively with patients, relatives and colleagues, including presentation skills • Understand the use of evidence, guidelines and audit to benefit patient care • Act in a professional manner at all times • Cope with ethical and legal issues which occur during the management of patients • Take a history and examine a patient • Identify the acutely unwell patient • Perform an initial assessment and initiate management in the acutely unwell patient

	<ul style="list-style-type: none"> • Prescribe safely • Assess patients with chest pain, palpitation, breathlessness, hypotension, neurological deficit. • Perform and interpret an ECG
Where the placement is based	Barts and The London NHS Trust; London Chest Hospital; CCU, Riviere Ward & Leander Ward.
Clinical Supervisor(s) for the placement	Dr Andrew Archbold
Main duties of the placement	<p>The F2 doctor is part of a rota which also includes five core medical trainees and a clinical fellow. Between them, they provide the day-to-day care and medical record keeping for the cardiology inpatients under the immediate supervision of two ward-based SpRs. One of the 'SHO' level doctors helps the on call SpR with the immediate assessment of patients admitted directly with confirmed or suspected ST elevation myocardial infarction.</p> <p>Daily Consultant ward rounds are held which operate on a 'Consultant of the week' basis to direct the care of inpatients. The F2 Cardiology doctor's night time on call rota involves covering the cardiothoracic patients under the supervision of a surgical SpR.</p>
Typical working pattern in this placement	<p>Variable according to shift pattern which includes 'days' 09:00-17:00, 'lates' 12:00-21:00, and 'nights' 21:00-0900.</p> <p>Mon: 09:00-17:00 ward round, ward cover Tues: 08:00 MDT followed by ward round Wed: 09:00-17:00 ward round, ward cover Thurs: Off Fri: 12:00-21:00 handover, clinical meeting, ward cover Sat: as per on call rota Sun: as per on call rota</p> <p><i>On call requirements:</i> 1 in ? full shift rota with nights covering cardiothoracic patients.</p>
Employer information	The employer for this post is Barts and The London NHS Trust. The post will be based at The London Chest Hospital which is in Bethnal Green, London E2 9JX. This hospital provides secondary level cardiac care to the local population and tertiary level cardiac, cardiothoracic, and respiratory care to the wider population of north east London.

It is important to note that this description is a typical example of your placement and may be subject to change.

Barts and The London NHS Trust Individual Placement Description

Placement	F2 General Practice
The department	Placements are provided by the London Deanery and GP placement practices vary
The type of work to expect and learning opportunities	<p>All doctors need to understand how the NHS works and the interface between primary and secondary care. Key themes in the curriculum for F2 doctors are highly appropriate to general practice</p> <ul style="list-style-type: none"> • Professionalism • Good clinical care • Recognition and management of the acutely ill patient • Discharge and planning for chronic disease management • Relationships with patients and communication skills • Patient safety within clinical governance • Infection control • Nutritional care • Health promotion, patient education and public health • Ethical and legal issues • Maintaining good medical practice • Teaching and training • Working with colleagues
Where the placement is based	London Deanery allocate practices closer to the time of starting the FY2 year
Clinical Supervisor(s) for the placement	This is provided by established GPs who are either GP trainers or supervisors approved by the London Deanery.
Main duties of the placement	Trainees are expected to undertake a clinical workload under supervision. Trainees are not expected to do 'out-of- hours' but may chose to experience this as a means of exposure to different types of acute illness and this can be arranged at the discretion of the GP clinical supervisor. Home visits are not compulsory but may provide valuable learning experience.
Typical working pattern in this placement	F2 doctors work a 10 session week (where 1 session is 4 hours). A typical working week might include 7 surgeries, F2s start with 30 min appointments for each patient reducing to 15-20 minutes and always have access to another doctor for support. Other sessions may include learning opportunities such as shadowing other health care professionals or group work with F2s from other practices. Another session may include other project work i.e. audit or directed study and a further session may include half day release for generic teaching programmes

Employer information	The employer for this post is Barts and the London NHS Trust.
